

4th International Population Health Research Institute Lecture in Population Health Sciences

Professor Simon Capewell

MB BS & MD (Newcastle); DSc, FRCPE; MSc (Edinburgh); FFPH & FESC.
Chair of Clinical Epidemiology, Public Health & Policy,
University of Liverpool

Professor Capewell trained in general, respiratory and cardiovascular medicine in Newcastle, Cardiff, and Oxford, then in public health in Edinburgh and Glasgow. He was appointed as the first Professor of Clinical Epidemiology in the University of Liverpool in 1999.

Simon manages a research programme mainly involving cardiovascular disease (**CVD**) and food policy. He developed the IMPACT model which is used to explain the changes in CHD mortality trends in > 20 Diverse Populations

His recent research includes programmes funded by MRC, NIHR, NIH, EU and BHF:

- Examining why CVD death rates have recently halved in the USA, Canada, Europe & elsewhere; (and conversely, why CVD rates are increasing in China and many other developing countries), *and*
- Exploring the development of effective and cost-saving cardiovascular prevention strategies: building on empirical evidence, policy analyses, and quantitative modelling in high middle and low income countries.

TUESDAY, JUNE 3rd, 2014

4th INTERNATIONAL LECTURE IN POPULATION HEALTH SCIENCES

5:00 pm - 6:00 pm

DBCVSRI Auditorium (Reception to follow)
20 Copeland Ave. Hamilton

“NCD prevention politics: pills or policies?”

TUESDAY, JUNE 3rd, 2014

8:00 am – 9:00 am
Location:

Cardiology Rounds
DBCVSRI Auditorium (20 Copeland Ave.)

“Preventing cardiac deaths in Canada: past and future”

WEDNESDAY, JUNE 4th, 2014

8:00 am – 9:00 am
Location:

PHRI Research Rounds
DBCVSRI Auditorium (20 Copeland Ave.)

“Science or showbiz? Using the media to support your public health interventions”
