

# TIMING Research Study

Timing of second dose of SARS-CoV2- mRNA vaccine on Immunologic and Neutralizing Antibody Response Generated in Healthcare workers

We are conducting **an observational study** for Healthcare workers, and are looking for:

Those who have received their first dose already, and have had their second dose delayed to day 35-42 or more

OR

Those receiving their first dose of the vaccine

If you are interested in participating or want to learn more, please contact:
