Scan the QR code to access the consent form!

Key Points from the COVID-19 Townhall:

1

It is normal to have questions, concerns, and worries about the COVID-19 Vaccine. Asking questions and being open to conversations is a great step! Please send us other questions you have: covidcommunity@phri.ca.

2

We are lucky to have a good supply of vaccines in Canada. Mixing vaccine brands is also recommended to be safe!

3

Different people will respond differently to vaccines depending on their health states. True adverse reactions are rare!

**Stay tuned for our next Townhall in July!
We will answer questions/concerns from
our International student community!**

Hamilton Public Health South Asian Vaccine Ambassador Contact Information:

Name: Megha Saxena

Email: Megha.Saxena@hamilton.ca

Phone: (905) 546-2424 Ext.3895

Megha:

The reason why I joined the Vaccine Ambassador team was because I have a healthcare background, and currently I am working as a Board Member of South Asian Heritage of Hamilton & Region which is a community outreach and art organization. This led me to develop a firm belief that I can help South Asian community to overcome any challenges experienced in accessing vaccines for Covid-19 including overcoming hesitancy and cultural barriers if any. I am motivated to help people learn more about COVID prevention and the importance of getting the COVID-19 Vaccine.

There are eleven Vaccine Ambassadors in total who speak a range of different languages including Punjabi, Urdu, Arabic, French, Nuer, Dazaga, Vietnamese, Mandarin, Spanish, Hindi and Rajasthani.
